Current operational evidence register

Buyer: Aster Finance (fictional).

Vendor: Lantern AI | Service: Support Reply Assistant | Environment: production

Coverage: October 2026 (2026-10). Issued: 2026-10-12. Version: 1.0. Review as of: 15 October 2026.

Vendor questionnaire assertions are claims; operational records describe only the supplied fictional records. Neither independently verifies real-world infrastructure.

Training use

Configuration AI-CONFIG-12 verified 12 October 2026: training_use=false for customer prompts and outputs in the named production service.

Data retention

Configuration AI-CONFIG-12: prompt and output stores have seven-day expiry. Diagnostic log stream diag-content retains full customer prompts for 45 days. A 1 September 2026 diagnostic record containing a customer prompt remains present on 12 October 2026.

Human oversight

Workflow version 4 has auto_send=false and requires an agent approval event. Review audit 12 October 2026: all 20 drafted replies had a named agent approval timestamp before their send timestamp.

Model change notice

Change MC-07: buyer notice sent 1 October 2026 for model deployment on 10 October 2026. Buyer approval recorded 3 October 2026; deployment completed 10 October 2026.

Subprocessor disclosure

Evidence register: the downstream-provider register was requested but is absent from this packet. This record does not identify the providers or establish that no subprocessors exist.

Evidence currency

This current register was issued 12 October 2026 and supersedes the July register. Its configuration, workflow and change records cover the named production service in October 2026.
