Production backup inventory INV-2026-10

Document: backup-inventory-202610 | Issued: 2026-10-12

1. Inventory scope and primary backup

Inventory owner: Nimbus Support infrastructure operations (synthetic). Verified 12 October 2026. Effective inventory window: 1-31 October 2026. Buyer: Aster Finance. Service: Customer Support Platform. Environment: production.

The inventory contains backup copies of production customer tickets, customer contact details and conversation histories for the reviewed service. It excludes staging, anonymized test records and other vendors.

Backup set BKP-IN-01 is located in Mumbai, India (asia-south1). It receives nightly encrypted snapshots of CST-PROD-01 with a retention period of 30 days.

The disaster-recovery replica of this same production backup set appears in section 2 on page 2.

Document: backup-inventory-202610 | Issued: 2026-10-12

2. Disaster-recovery replica location

Replica BKP-SG-02 contains Aster Finance production customer-data backups for the Customer Support Platform and is stored in Singapore (asia-southeast1).

Vendor: Nimbus Support. Environment: production. Status: active throughout 1-31 October 2026. Source: BKP-IN-01. Contents: identifiable customer tickets, contact details and conversation histories, not anonymized test data.

Last successful replica synchronization: 12 October 2026 at 02:10 UTC. Retention: 30 days. The location is the physical data storage region, not an administrator's office or network transit route.

This inventory supersedes the July 2026 inventory. The inventory owner has not supplied a policy exception or an approved migration completion record.
